

Just like the Coronavirus has proved to be a serious infectious virus, the same is true of spiritual 'infections' - they can be spiritually dangerous and deadly. For instance, the writer of Hebrews warned about a "root of bitterness springing up" in an individual, the result being that many "become defiled". (Hebrews 12:15) Moses warned about the same thing in Deuteronomy 29:18. But wait - if bitterness can be spread like an infection, could positive traits like joy be spread as well? Of course! In fact, joy and similar traits are 'vaccines' against carnal spiritual infections. We can spread love and other Christlike traits to others.

Choose to be a carrier of love, peace, joy and hope as you interact with others. Be a super-spreader of Christlike traits wherever you go.

Hebrews 12:15 "Looking carefully lest anyone fall short of the grace of God; lest any root of bitterness springing up cause trouble, and by this many become defiled."
