

Biblical numbers are highly significant. For example, 1 400 is the cubic mileage of the New Jerusalem, God's eternal capital city, in length, breadth, and height. Just in area coverage, that is larger than India. But a city rising 1 400 miles into the sky? That calls for a huge planet - a supersized New Earth, which God is going to re-create. But there is no number large enough for the days, years, or centuries we will be there, for it will be for all eternity, which is time without end.

When you think of Heaven, don't think of a vapoury existence. Heaven is a realm of unsurpassed joy, unfading glory, undiminished bliss, unlimited delights, and unending pleasures. It will be a perfect existence. Our glorified, resurrection bodies will be modelled after Jesus's own, and we will live with Him in the New Heaven, New Earth, and His city of New Jerusalem, spending eternity counting our blessings!

Revelation 21:15-17 "The angel who talked to me held in his hand a gold measuring stick to measure the city, its gates, and its wall. When he measured it, he found it was a square, as wide as it was long. In fact, its length and width and height were each 1 400 miles.... (according to the human standard used by the angel)."
